**Information Builders**

**Technical Memo**

FOCUS Release 6.5.8/9312 and up                                           TM 7859.1

## Enabling a Site-Specified Submit Exit Routine

This Tech Memo is for sites with ACF2 5.2 or lower and FOCUS Release 6.5.8/9312 or higher. Sites with ACF2 5.2 or lower and FOCUS Releases 6.5.8/9310 and lower need to use Tech Memo 7859. Sites with ACF2 6.0 or higher have no need for either of these Tech Memos.

FOCUS for MVS/TSO includes an enhancement to allow TED SUBMIT and DYNAM SUBMIT to call security exit IKJEFF10. Users must be running FOCUS from an authorized library to access IKJEFF10.

To enable the use of the exit, a zap must be performed on the dataset FOCLIB.LOAD, included on the FOCUS distribution tape. This zap can be found in the member SUBMITZ2 of FOCCTL.DATA also on the distribution tape. The steps to follow are:

1.   Read the comments, for the setting of options flags.
2.   Edit the job card of this member.
3.   Edit the card SYSLIB to point to your authorized FOCLIB.LOAD.
4.   Submit the zap.
